WELCOME TO MAT XXX FALL 2020!

The homework set Introduction to WeBWorK is not required, and will not count toward your grade.

Answering WeBWorK Questions

When answering questions, type the answers directly in the answer blank and do not copy-paste them from somewhere else. If you copy-paste, the answer might not be accepted and you might receive an error message.

It is recommended you enter exact values for your answers whenever possible, e.g. \( \sqrt{2} \), rather than 1.4142. If you are not entering exact values, you should use at least 6 decimal places to ensure enough accuracy for your answer to be counted as correct.

Test Rules

Tests are at the bottom of the page.
Once you open your test, the timer starts; make sure to pay attention to how much time you have left.
When you are ready to submit your answers, click on Grade Test at the bottom of the page.
You are allowed two submissions before the time is up. After your first submission, write down which answers are incorrect.
You need to click on Grade Test before the time is up. If you do not click on Grade Test, none of your answers will be recorded and you will receive a score of zero. Try to give yourself ample time to fix the incorrect answers after the first submission.
Even if you get all of the questions right on your first attempt, you should click on Grade Test twice, to make sure the score is properly recorded.
Do NOT open WeBWorK in another tab, window or device while taking the test. Do not click on the Back button or the Enter button. If you do open WeBWorK in another window, you will receive a score of 0 for the test.
